

Fernanda Gomes

March 31 — May 02 1998
Exposição no 1º piso

Press Release

Series of pieces and drawings dealing with urban matters, that oscillate between the object and the sculpture. The artist works with physical phenomena, like magnetism, light and sound waves, movement and inertia. At the same time, the exhibit is reminiscent both of the universe of child games and of the feminine side, bu the use of diverse materials such as thread, clove, needles, fabrics, hangers, bobbin, iron, and more.
