

Laura Belém

The other landscape

May 10 — June 18 2011

Press Release

Laura Belém Exhibition Laura Belém presents the exhibition “A Outra Paisagem” (“Another Landscape”) with new works in different supports and formats. For the creation of the works, the artist pursued inspiration in the city of São Paulo, developing free and poetics relationships from her dialogue with the landscape and memory of this city. On the works displayed, there is playful connection between interior and exterior, view and viewpoint. By choosing to reveal what is simple and poetic, Laura invites the viewers to make a pause and carefully contemplate their relationship with things around themselves in order to build a new approach to those things and, thereafter, establish a new dialogue with the surrounding world.
